

A modern living room interior featuring a large, textured brown sectional sofa with two white pillows and two white spherical ornaments. In front of the sofa is a low, black, rectangular coffee table with a glass top, holding a vase of white flowers, a bowl, and some books. The floor is made of light-colored wood-look planks. The wall behind the sofa is covered in large, dark, textured panels. To the right, there is a floor lamp with a warm light and a curtain. The overall aesthetic is contemporary and minimalist.

VILLEROCK

Mineral Hybrid Core

MHC FLOOR PANELS

MHC (Mineral Hybrid Core) is the next generation of SPC (Stone Polymer Composite) flooring. It is a new type of core that consists of **70% ground stone**.

The remainder is made up of polymers and resins, which give the floor its flexibility and resilience. Our technology combines all the advantages of stone and vinyl, eliminating the disadvantages of each of these materials separately.

**FOR UNDERFLOOR
HEATING**

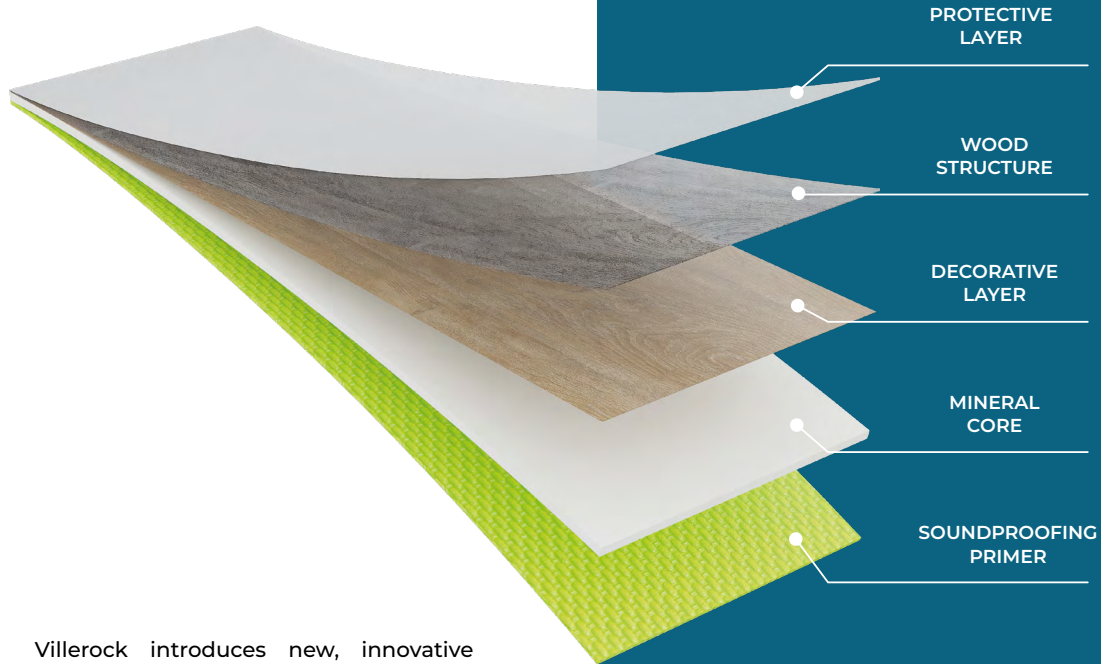

MHC and vinyl panels

Our core has a significant advantage over traditional vinyl cores. **The thermal expansion of the MHC core** (according to laboratory results), **is less than 0.1%** (i.e. on a 128 cm long panel it is approximately 1.2 mm). **In the case of vinyl panels, it is 0.25%** - i.e. on an identical 128 cm long panel it is more than 3 mm!

Villerock panels with MHC technology guarantee durability, elegance, and functionality. Choose flooring that adds character to your home and stands the test of time.

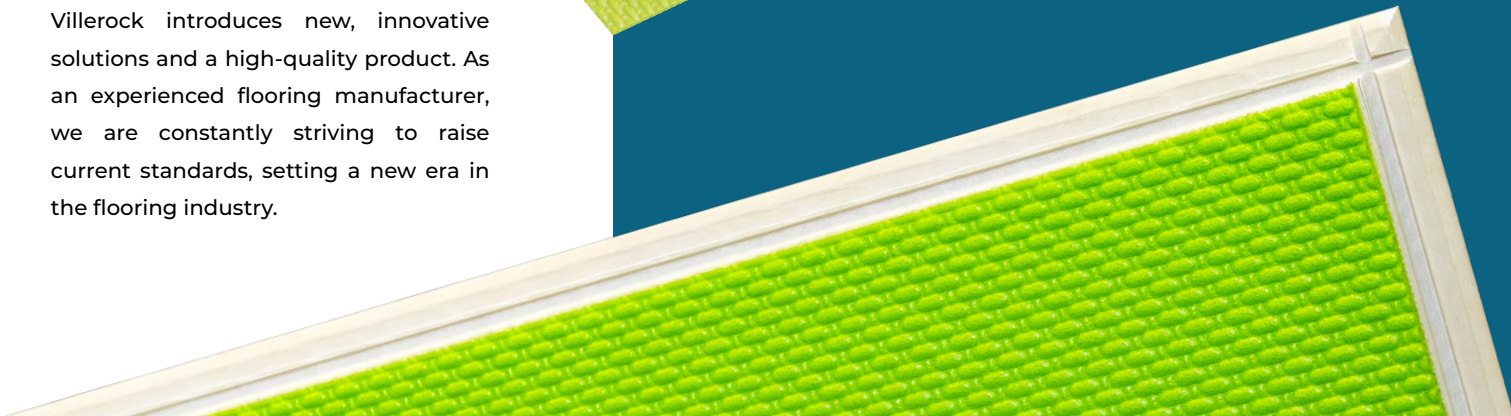

Why is **MHC** the number one choice?

- the elegance of wood: **MHC** reproduces the authentic grain and texture of wood, giving the floor a natural look
- **CLICK installation technology:** Installing the panels is easier than ever before
- **Silent Step Pad technology:** the integrated high-density **IXPE** ensures a quiet and comfortable experience

The integrated
IXPE pad with Silent
Step Pad technology
ensures not only silence
but also comfort.

Villerock introduces new, innovative solutions and a high-quality product. As an experienced flooring manufacturer, we are constantly striving to raise current standards, setting a new era in the flooring industry.

EASY&FAST

WALL PANELS

COMFORT INNOVATION DURABILITY

Villeroock wall panels **consist of more than 70% finely ground natural stone**. The decor is pressed in at the production stage, making it extremely durable and scratch-resistant.

Thanks to advanced high-resolution technology, we achieve a natural look that faithfully replicates the texture of stone. **Innovative self-leveling 'click' locks enable quick, clean, and easy installation**. An additional advantage is the absence of grout lines and the ease of maintenance.
